

BATHCOHOME

MANAGING BATHROOMS IN CONSTRUCTION

Edition 12

BATHCOHOME specialise in the design and supply of bathrooms to property developers and contractors throughout the UK.

From new build residential developments to large scale refurbishment projects, we provide unique and close support to clients, ensuring a smooth process from bathroom design to point of product installation.

Efficiency and Excellence are at the heart of everything we do, to meet and exceed the expectations and requirements of the construction industry.

Our portfolio includes a wide range of quality bathroom products, with a focus on current designs and style. We partner with reputable manufacturers around the globe, carefully selected to maintain reliability across our Edwrox product ranges.

All of this is delivered through our EXO Service which is outlined on the following page.

EXO Service

01 

Design

Share the plans for your project for the design team to create 3D CAD drawings in-line with your choice of products from our range. The designs can be provided in A3 laminated format for your installers to use on site.

02 

Branded Proposal

Customised Proposal showcasing full product choices and costs.
Your own branded spec presentation for your marketing purposes.

03 

Project Management

Introduction to the Project Management Team who you will liaise with throughout the project. An internal meeting between the sales team and project management team to ensure full understanding of your contract.

04 

Site Surveys

If required, we will inspect each property prior to delivery, to check measurements and the layout details. This also ensures that access and delivery will be seamless.

05 

Call-off Schedule

A full bathroom schedule is provided for the project, clearly presented by plot and by room, with full product descriptions for each bathroom. Provide approximate call-off dates for first fix and second fix Items and the project manager will maintain close contact with site and the installers.

06 

Reserved Stock

Allocated stock in-line with your call-off schedule, reserved ahead of time for delivery on-time and in full.

07 

Labelled Packaging

All product labelled per plot and per room to avoid confusion on-site. Delivered by our own dedicated vans by our careful drivers.

08 

Aftercare

Upon request, a data pack is provided on completion of the project for the bathrooms supplied. This is for warranty, spare parts and ongoing maintenance purposes.

HYDROWALL

Hydrowall is the showerproof alternative to tiling. These elegant wall panels speed up the bathroom installation process and require less preparation prior to install. Hydrowall is a hygienic solution, without the usual grout lines that come with tiles.
This solution comes with a robust and wipe clean surface, for ease of ongoing maintenance. Available in matt or gloss finishes with over 20 colours to choose from. Choose between interlocking tongue and groove panels or slimline jointing profiles.

Key Sectors

- New Build Houses
- Bathroom Renovations
- Modular Homes
- Hotels
- Student Accommodation
- Social Housing

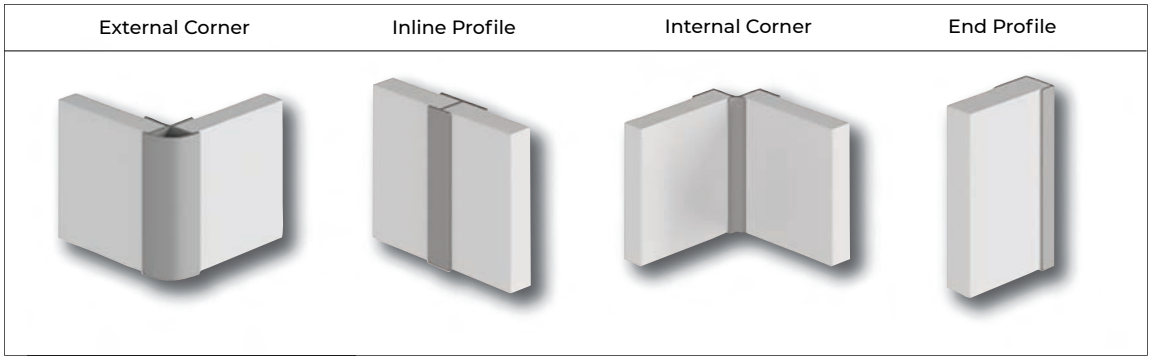
Advantages

- Fast and simple installation
- Hygienic solution
  No grout lines
- Easy to clean
- Tongue and groove finish
- 15 Year Guarantee
- Can be installed over old surfaces

Versatile Styling

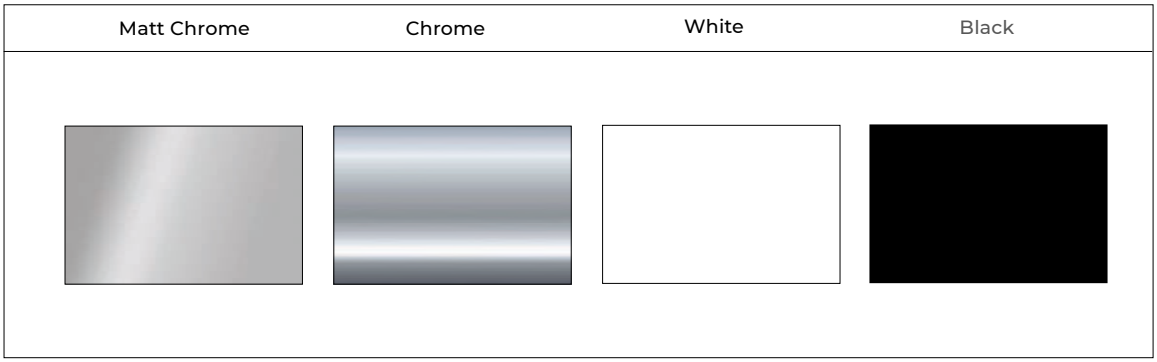
Hydrowall is suited to a wide variety of applications. The large range of colours and finishes gives scope for Hydrowall to be installed on both Mid-Range and Premium projects. Panels are suited to shower areas, feature walls and full bathrooms. Choose from beautiful marble and stone designs with deep blacks and stunning whites or more relaxed patterns suited to the project. The seamless look created by the tongue and groove jointing process creates a statement in every bathroom, coupled with a choice of corner trim to complete the effect.

Profiles



Profiles in black, white or chrome for end of runs, internal or external corners. In-line jointing strips also available when panels are not the tongue & groove option. Profiles are fabricated from high grade aluminium.

Colour Profile Options



Hydrowall High Grab adhesive is used to apply panels to the substrate and for tongue and groove jointing or the profiles.
